www.blythedale.org

How can research be leveraged to better treat kids following acquired brain injury? What role can it play in optimizing treatment? How relevant are the animal models used in basic research to the clinical presentation? Join basic, translational, and clinical researchers and clinicians from Blythedale Children's Hospital, the Burke Neurological Institute, and Weill Cornell Medicine as they discuss the role that research can and should play in advancing clinical care.

Course Instructors

Nazia Alam, Ph.D.
Lab Manager, Laboratory for Visual Disease and Therapy
Burke Neurological Institute
Postdoctoral Fellow, Vision Recovery Program
Blythedale Children's Hospital

William Watson, Ph.D.
Clinical Professor of Neuropsychology,
Department of Rehabilitation and Regenerative Medicine,
Columbia University
Neuropsychologist
Blythedale Children's Hospital

Sudhin Shah, Ph.D.
Assistant Professor of Neuroscience
in Rehabilitation Medicine,
Weill Cornell Medicine
Scientific Director of Cognitive Recovery
Research Program,
Blythedale Children's Hospital

Schedule

5:15 PM
Introduction: Dianna E. Willis, Ph.D.

5:30 PM – 5:50 PM
Presenter: Nazia Alam, Ph.D.
Title of Talk: Using Animal Models of Behavioral Changes

5:55 PM – 6:15 PM
Presenter: William Watson, Ph.D.
Title of Talk: Clinical Presentation in Brain Injured Kids

6:20 PM – 6:30 PM
Break

6:30 PM – 6:50 PM
Presenter: Sudhin Shah, Ph.D.
Title of Talk: Evidence-Based Clinical Trials for Optimizing Best Clinical Care

Keynote Speaker
6:55 PM - 7:15 PM
Chani Traube, M.D.
Title of Talk: Pediatric Delirium: Impact and Opportunities
Weill Cornell Medicine

7:30 PM
Conclusion: Dianna E. Willis, Ph.D.

Keynote Speaker

Chani Traube, M.D.
Associate Attending Pediatrician
NewYork-Presbyterian Hospital
Associate Professor of Clinical Pediatrics - Weill Cornell Medicine,
Cornell University

Dr. Chani Traube is an Associate Professor of Pediatrics in the Division of Critical Care Medicine at New York-Presbyterian and Komansky Children's Hospital at Weill Cornell Medicine.

Her research experience has been in pediatric neuro-critical care, delirium in seriously ill children, and in the development of a genetic vaccine against Respiratory Syncytial Virus. Dr. Traube's clinical interest and area of expertise is in the diagnosis and management of critically ill children.

No Course Fee
