Temporal Controls Over Cortical Neuron Diversity

March 1
Tuesday, 12:30pm
Online Webinar
For Researchers

Speaker:
Denis Jabaudon, M.D., Ph.D.
Professor
Department of Basic Neuroscience
University of Geneva

Host: Vibhu Sahni, Ph.D.

Research Statement

Little is known about how neurons become independent of trophic support. Answering this question will provide insight into how aging neurons avoid cell death and persist for a lifetime. An increased resistance to the loss of trophic factors represents a protective mechanism to prevent neurodegeneration.
